

Pantaloons

These are made very simple as you are really showing off the frilly petticoats. Simply take two rectangle squares of white material, folding over both ends and gluing to wrong side. Then simply glue into a tube and slide up dolls legs. Gather as needed and tie shut.

Petticoat

Cut out circle including waist hole from white petticoat material. Sew on three rounds of synthetic lace on one side, and one round the very edge of top side. Slide on doll and hand stitch some nip and tucks to get it to the shape you want OR just run a gathering stitch along

bottom. Your choice. Spray with stiffy for even more control over look. For more specific directions on making the petticoat, and skirt, please refer to MADAM FIFI directions on my website . This has color, step by step directions. Simply click to www.miniatureart.com and select the FRILLS AND FANCY online ezine.

Skirt

Cut out circle from blue velvet skin material. Gather top and glue on over petticoat in appropriate folds.

Bodice

Before you put torso of doll on legs/hips, put line of glue around chest – just under arms, down to bottom. Sprinkle flocking on as needed, and gently pat into glue. Repeat as necessary to cover. Set aside to dry. Attach torso to legs and tie silk ribbon around waist with bow (this helps hide the joint).

Sleeves

Cut two small rectangles from velvet and form tubes. Gather and slide up arms as desired, gathering right below shoulder. Cut a piece of trim from edge of petticoat material to cover top of flocked torso, and around arms.

Decorations

Hair ornament after doing basic wiggling line and gluing on waves (see my FRILLS AND FANCY for many helpful color photos on wiggling).... take out the brass finding, and paint with blue paint or flocking as desired. We bent ours into a 'U' shape and glued to top of head with a couple of feathers.

****OPTIONAL**** this is NOT included in kit but if you'd like to make a jeweled brooch for her bodice, simply roll out a TINY piece of fimo, and shape into small bow. Then poke tiny beads or rhinestones into fimo and bake. After cooled, carefully go over whole thing with fingernail polish to prevent 'stones' from falling out.
